

PUPPY CARE TIPS

Getting a puppy is a big decision as it means you are responsible for a life, a task not to be taken lightly.

VACCINATION

All our puppies are registered at Kusa and will receive their inoculation and deworming at 6 weeks of age.

I prefer to keep them till they are 8 weeks of age.

I'm also available to my buyers to assist with questions that may arise and give them information on how to take care off the puppie when they go to their new home.

Please ensure your puppy receives its full course of vaccinations and yearly boosters on time.

Do not take your puppy to a public place where they might be exposed to other pets germs until the full course of vaccinations has been done (16 weeks)

ABOUT TRIDENT YORKSHIRE TERRIERS

I am a registered yorkshire terrier breeder from Pretoria.

I currently have a few breeding pairs of Yorkies, and they are like my family, my companions, my children. I am very proud of each one of them.

Part of their staple diet is to spoil each yorkie every single day, and even though it is a full-time job, I love every second of it.

I know I will look back one day and not regret one moment!

They contribute to my success in striving to breed healthy purebred Yorkshire terriers.

I breed miniatures as well as the standard size, Average adult size of my puppies are 1.5kg - 3.0kg's Every one in a while I do get a tiny puppy.
